Agellis receives an order for 110 KEuro from SMS Concast

AGELLIS Group, which develops and sells products and solutions to the global metals industry, has received an order totaling 110 KEuro for measurement systems from SMS Concast, Switzerland.

SMS Concast, part of the German SMS group, designs and supplies continuous casting machines, arc furnaces and ladle furnaces for steel mills. SMS Concast has, as a result of a co-operation agreement, adapted some of their equipment to use Agellis products.

The order, which consists of a total of three systems for level measurement in continuous casting moulds (EMLI-Ms), is for supply to a steel plant in the USA and all units are expected to be installed during the first half of 2013.

To achieve high quality when casting steel, level measurement of the molten steel in the mold is a very important process parameter. The Agellis EMLI-Ms measures the level of molten steel with high accuracy and reliability during casting.

"We see all follow-up orders from SMS Concast as evidence that our products provide business benefits for both the end user and designers." says Patrik Bloemer, CEO of Agellis.

For competitive reasons, Agellis chooses not to mention the end user plant by name.

All Agellis products are based on a common platform, namely the EMLI system electronics. The EMLI-Ms measures molten steel with high precision in the mould during casting. The sensor is very close to the steel and must therefore meet very high survival and environmental standards. Good level measurement of the molten steel in the mould is a prerequisite for a smooth, high quality steel production.

AGELLIS Group AB develops and markets modern, robust solutions for global metal producers. Agellis offers products for level measurement which facilitate increased automation of production. Agellis customers are based all around the world and include Sandvik Materials Technology in Sweden and several plants within the ArcelorMittal group. Agellis was founded 2002 and is listed on NASDAQ OMX First North with Thenberg & Kinde Fondkommission AB as Certified Adviser.
