

Press release

Agellis receives first Scandinavian order for unique furnace measurement system.

AGELLIS Group, which develops and sells products and solutions to the global metals industry, has received an order totaling 660 KSEK for a new measurement system to be installed at Ovako Hofors Sweden.

The order relates to a system EMLI-FBL (Furnace Bath Level) that will measure the steel level in an EAF (Electric Arc Furnace) that is part of Ovako Hofors melting process. The measurement technology will provide operators with an automatic, accurate, reliable and safe method of monitoring important molten steel levels in this part of the process. The EMLI-FBL system is expected to be delivered and commissioned during the fourth quarter of 2013.

Patrik Fredriksson, Steel Plant Manager at Ovako Hofors says that; "the EMLI-FBL system will provide us with the unique possibility of taking bath level measurements with electrode power on or power off. This information will be used to develop our process even further".

"Having such an important Scandinavian steelmaker choose our products to help improve their processes is very important to us", says Patrik Bloemer, CEO of Agellis.

All Agellis products are based on a common electronics platform called EMLI. EMLI-FBL (Furnace Bath Level) automatically measures the bath level in an EAF with high accuracy, reliability and safety. A reliable measurement of the steel bath level taken while electrode power is on or off helps operators make processing decisions that can help to increase production, improve safety and reduce maintenance.

***AGELLIS Group AB** develops and markets modern, robust solutions for global metal producers. Agellis offers products for level measurement which facilitate increased automation of production. Agellis customers are based all around the world and include Sandvik Materials Technology in Sweden and several plants within the ArcelorMittal group. Agellis was founded 2002 and is listed on NASDAQ OMX First North with Thenberg & Kinde Fondkommission AB as Certified Adviser.*

Ovako is a leading European producer of engineering steel for customers in the bearing, transportation and engineering industries. Our production covers low-alloy steels and carbon steels in the form of bars, tubes, rings and pre-components. The company has production plants in 11 locations and a number of sales companies in Europe and the USA. Net sales in 2012 amounted to EUR 937 million and the company had 3,040 employees. Our total production capacity is 1.3 million tonnes of steel per year. More information can be found at www.ovako.com
