

## **Agellis provides level measurements in the Middle East**

**Agellis Group AB has received an order for the supply of an EMLI-FurnaceProfile system. The order comes from a non-ferrous producer for a smelter plant in the Middle East.**

The EMLI-FurnaceProfile system allows process improvement through objective and consistent metal level measurement and complete furnace material profiling. The system is used to measure metal levels in all type of furnaces with high accuracy and repeatability.

*“The non-ferrous industry is an expanding market for Agellis Group’s solutions where we can offer improved process control through level measurement objectivity, elimination of quality variations along with increased operator safety through automation”, says Patrik Bloemer, CEO of Agellis Group.*

Delivery of the system is expected to be made during the 4<sup>th</sup> quarter of 2017.

All Agellis electromagnetic products are based on a common electronic platform called EMLI.

**AGELLIS Group AB** develops and markets modern, robust solutions for global metal producers. Agellis’ solutions enable increased automation, increased process efficiency and improved safety for personnel within metal production. Agellis was founded in 2002 and is today one of the leading players in its market niche. More information can be found at [www.agellis.com](http://www.agellis.com).
